School officials, staff and volunteers, are not medical professionals and, therefore, they are unlawfully practising medicine by prescribing, recommending, and using coercion to insist that school children take this experimental medical treatment.

Students are at nearly zero % risk of contracting or transmitting this respiratory illness and are instead buffers which help others build their immune system. The overall survival rate is 99.997%.

ACTION4 CANADA

Covid Mandate” Non-Consent Exemption for Students Including, but not Limited to Masks, Sanitizers, Social Distancing, and “Vaccination”

To: School Superintendent, School Board Executives, School Principal, Teacher, Administration, and Union

πAttn: _____,

This is to notify you that I (including my child) will no longer comply with any mask guidelines and/or Orders in the public/private school system. The Covid measures are unauthorized by law and are in violation of the Charter of Rights, Bill of Rights, and the Convention on the Rights of the Child. The mandates are putting children at risk of harm both physically and mentally. There is a staggering 24-31% increase in emergency mental health hospitalizations and an alarming increase in suicide and suicide ideation for minors age 5-17.

On April 8, 2021 a German Court ruled against masks, social distancing, and testing for students. Stating, “the measures now prohibited, represent a present danger to the mental, physical or psychological well-being of the child to such an extent that, if they continue to develop without intervention, considerable harm can be foreseen with a high degree of certainty. The children are physically, psychologically, and pedagogically damaged and their rights are violated without any benefit for the children themselves or third parties.”

Further, according to the German court’s conviction, “school administrators, teachers and others cannot invoke the state-law regulations on which the measures are based, because they are unconstitutional and thus void.” Masks are ineffective in protecting against influenza and other aerosol-sized respiratory illnesses. BC Health Officer, Bonnie Henry, attested to this in the 2015 Ontario Nurses Arbitration saying, “there’s very scant evidence about the value of masks in preventing the transmission of influenza.”

Common side-effects of mask wearing include headaches, drowsiness, dizziness, reduced ability to concentrate, and reductions in cognitive function. Also, given that the development of neurodegenerative diseases can take years to manifest, we cannot ignore the potential long-term harms of continual mask usage. The stressful impact of masking also runs the risk of having a damaging and permanent impact on our child’s immune system. Additional medical harms caused by masks and hand sanitizers include rash and burning skin irritations.

Children are at nearly zero percent risk of contracting or transmitting the respiratory virus referred to as Covid-19 and have a 99.997% survival rate. Further, schools are reportedly at very low risk for transmission of this virus. Health Officers, in response to heavy lobbying by Teacher’s Unions and other NGO groups, are ignoring the harms to minors and continuing to implement the exaggerated emergency measures.

Therefore, as parent/legal guardian, in the best interest of my child, I hereby provide this official Notice of Exemption from any and all restrictions, mandates, and/or medical treatments which are, or may, cause physical and/or psychological harm or interfere with my child’s guaranteed right to an education. This letter also serves as an official personal Notice of Liability that should you not immediately comply with respecting this exemption I will hold you culpable for any harm or injury to my child that may result from your actions, or lack thereof.

Legal Parent/Guardian: _____ Print Name: _____

Student Name: _____

Name of School: _____
