Re: Letter of Opposition to WMR's Plan20-50

To whom it may concern,

I/we have read WMR's Plan20-50 and I am/we are **strongly opposed** to this proposed plan passing as provincial law or city by-law.

My/our opposition includes the following points:

1. Plan20-50 has not been given any news media coverage that I am/we are aware of.
2. There has been no public debate presenting the benefits and risks to the public that I am/we are aware of.
3. I/we do not agree with allowing an unelected body to oversee the by-laws of elected municipal governments, especially when they claim to support unknown global corporations.
4. Plan20-50 proposes the legal closing of streets in cities and water wells in rural communities for purposes that appear to be based on a definition of climate change that changes itself.
5. Further, Michael Moore, Chair of WMR has connections to the Manitoba Home Builders' Association. This creates enough bias and **conflict of interest** in itself to warrant the immediate halt of Plan20-50.
6. This plan needs to be put on hold until answers can be provided and more people can be made aware. I/we are serving you notice that there are many questions that need answers in order for the public to be able to make an informed decision in providing lawful consent/agreement to a proposed plan of this magnitude.
7. Lastly, any letters supporting Plan20-50 from members of **The Assiniboia Chamber of Commerce** should be disregarded entirely because the President/Executive Director, **Kristi Meek** has attempted to bribe its members by promising to list their company name for free in exchange for signing their generic letter commending WMR.

In conclusion, these are not exhaustive reasons to stop Plan20-50. There is much vagueness to Plan20-50 and inadequate information on how this plan affects land rights of homeowners among other crucial areas of interest to the public; therefore, **Plan20-50 should be halted immediately.**

Respectfully,

See Appendix A for list of concerned citizens
