

# RCMP member sent on unpaid leave writes this powerful letter you must read:

December 31, 2021

Long, but great read.

RCMP member sent on unpaid leave writes this powerful letter you must read:

Hi everyone,

Since most members make a goodbye email before they leave, I figured I should as well, despite the "special" circumstances around my departure. Anyways, my time here in the RCMP is up. For now. The low T wannabe tyrants in Ottawa have decided that I can no longer serve as a police officer because I refuse to tell them if I have submitted to their "vaccine" edict. I've served in the RCMP for 21 years and one of the first things I said to any person I ever arrested was "you don't have to say anything to me." Unfortunately, our government has told me that I have to tell them what's in my body, and if the right drug is not inside me, I have to get it as condition of my continuing employment, human rights be damned. Why did I put vaccine in quotations above you ask? More on that later. Buckle up and tighten the straps on your government mandated shame muzzle, this goodbye email will likely ruffle some feathers.

My journey to this point of our dystopian, medical, apartheid state started like many of yours. Watching the television almost 2 years ago as reports started coming in of some strange virus out of Wuhan. I was a little concerned, but not much. You see, for the last 10 years of my life I had spent a lot of time as an amateur researcher of history and learned to my dismay that the official narrative of most events is usually a little suspect at best. Like weapons of mass destruction in Iraq, or the January 6th "insurrection" in D.C., the examples are sadly numerous.

I've also always been a very independent person. Following the herd has never appealed to me. When a belief is put forth to me I always evaluate it for myself and don't simply accept it's veracity based on the authority behind it. For example, during the last Federal Government census, I could not help but notice that the gender section had 3 boxes. Male, Female and other, which was a blank box. For real, the Federal Government of Canada allowed you to make up your own gender on the last official census. I found this to be a combination of amusing and insane. Feeling particularly bull headed and cheeky at the time, I naturally chose Minotaur as my gender. Yes, that's right, on the Canadian government census my gender is that of a mythical giant man with the head of a bull.

So back to my Covid journey. I was skeptical of the pandemic from the start but decided to wait and see what evidence would surface of this dangerous pandemic. So I sat back and quietly observed. At that time, and still at the time I'm writing this, I was the admin NCO on the watch. I was in the unique position of seeing every file that came through PRIME in the 46 hour window I was at work each week. Naturally, this included all sudden death files. Pay attention now, have another sip of your latte if you have to. Since the pandemic began, until now, I was in a position to see every single sudden death file that came through our

detachment area. What did I notice in this position? Nothing. No upwards trend whatsoever. Funny enough, I didn't see people dropping dead in my neighbourhood either.

This was a very stark contrast to what I saw in media. A non-stop chorus on TV, radio, and internet, of case counts, hospitalizations and deaths. At no time in my life had I seen anything like it. A complete disconnect between my observed reality and that which was portrayed by my government and the government subsidized mainstream media. And they were reporting deaths in care homes. Care homes? When did the media ever report deaths in care homes unless it was some sort of instance of gross negligence? It's called end of life care for a reason. People go to care homes at the end of their life. Death is the natural consequence, and this fact used to be understood as common sense.

When the statistics started showing that the vast majority of anyone dying from Covid, either had one or more co-morbidities, or was older than the average life expectancy, my skepticism of the pandemic narrative only grew. Then in the summer of 2020, I got Covid. For a few days I was really tired and shivered a lot. Then it was over. I survived the "deadly" disease like the vast majority of anyone else who caught it. To be honest, I've had worse plus, and worse hangovers.

At the end of 2020 I became convinced we were all being force fed a giant load of absolute bullshit. Don't believe me? Look at world population statistics. Here's a sample. At the end of 2018, the world population was 7,631,091,040 and that year 57,625,149 people died. This showed an overall death rate of .76%. I know some of you are shocked by this, but yes, 57 million people died of all types of causes in 2018. When you reach the end of your life, you die. At the end of 2019, the world population was 7,713,468,100 and 58,394,378 died. Naturally, because we had more people reaching the end of their lives, more people died. The death rate that year was .76%. Now let's see what 2020 brought us. The year of the pandemic. At the end of 2020, the world population was 7,794,798,739 and 59,230,795 died. The death rate was .76%. Yes. That's right. In the year of the deadly pandemic the world's population grew by 81,330,639 people and the death rate did not change by even a hundredth of a percent. The media never once pulled back the lens to show this, they continued to show the narrow focus of case counts and Covid deaths. Even going so far as to change causes of death so that someone who died "with" Covid in their system was counted as someone who died "of" Covid. The Western world shut down over a disease about as deadly as the common flu. And our rights were shut down along with it.

Despite this disease having a non existant effect on the overall death rate of the world's population the call came out for a mass vaccination. Since I was already skeptical of the

pandemic, I was naturally skeptical of the need for a "vaccine". Oh look, vaccine is in quotations again. Why am I doing that?

## Because it's not a f^#king vaccine!!!

A vaccine is created when a virus from nature is made harmless in a lab and then cultivated there. The vaccine, created from the neutered virus, is then injected into a person. The body then reacts to the vaccine just like it would to the unaltered, dangerous virus. However, because the vaccine is a modified harmless version of the virus, it doesn't cause disease and the body's natural immunity is able to "learn" how to cope with the virus. This "learning" is lifelong and is why people develop an immunity to whatever they were inoculated against. People who have been vaccinated against Measles do not get Measles, and the same with mumps etc etc. None of the so called Covid "vaccines" meet this definition. If you were wondering why "vaccinated" people are still getting Covid, and spreading it, this is why. The fact that "vaccinated" people still get Covid and spread it should tell you that this madness will never end as long as you buy into the official narrative.

How these new Covid "vaccines" work is based on a brand new technology never used on a massive scale. Particularly in regards to the 2 "vaccines" most heavily promoted, Moderna and Pfizer. These drugs use artificial Mrna technology. Think of Mrna as the software of our bodies. The operating instructions. Pfizer and Moderna use artificial Mrna based on a computer algorithm. These instructions are encapsulated in something called a nano lipid. A nano lipid is a tiny envelope of fat. There are trillions of these nano lipids in the Pfizer and Moderna shots. Once injected they circulate through your body through your body's lymphatic system. Upon the nano lipids dissolving, your body receives new instructions for its immune system. These instructions tell your immune system to make spike proteins which resemble the spike proteins of the Covid virus. This is the key distinction you need to be aware of. Your body is being instructed to make the very pathogen that your immune system builds a defense against. This is completely uncharted territory and nothing like this has ever been done on the human population on such a large scale. The drug companies themselves have admitted they don't know the long term side effects. When a recent FOIA request was sent to the FDA in the US, requesting the safety data they had on the Pfizer vaccine, the FDA asked a judge for 75 years to comply with the request. Nothing sketchy there.

To make matters worse. Every single Western nation has passed legislation shielding these drug companies from civil liability, if their vaccines harm people. While this legislation was passed years ago, it still applies to the Covid "vaccines." You heard right. If the Moderna Covid

"vaccine" harms you, you cannot sue Moderna. Same with every other drug company that makes any vaccine, Covid "vaccine" or not. They all have civil liability immunity for the vaccines they manufacture. Vaccine injury compensation has been paid out in the US under a tax funded program called the vaccine injury compensation fund, not as a remedy through civil lawsuits. Established in 1986, this fund has paid out \$4.4 billion in claims. In Canada, we had no such vaccine injury fund until June of 2021. Hand on chin emoji goes here.

Make no mistake here. This is a large scale drug trial and whoever was jabbed is taking part. Having educated myself about these new drugs I was very skeptical when they started promoting them. Additionally, nearly all the drug companies making Covid "vaccines" have a very checkered history in quality control and ethics. J and J has payed 9 billion in settlements throughout it's lifetime and Pfizer has payed \$4.6 billion. Not for their vaccines of course, for their other pharmaceuticals. Moderna was founded in 2010 and their Covid "vaccine" is the first product they have ever put on the market. Information has since come to light that the Moderna "vaccine" was finishing in development in December of 2019, immediately before the pandemic hit. It's almost like they were anticipating something. Do I dare put my hand on my chin and gaze thoughtfully upwards a second time?

As I was already skeptical about the entire pandemic narrative, I decided a long time ago that I was not going to take any of these "vaccines". So as I had decided to sit back and watch how the so called pandemic unfolded, I decided to observe the vaccination campaign. One of the first things I noticed is that people like me were completely ignored and never talked about. What do I mean by people by like me? I mean people who had Covid and recovered. Suddenly, natural immunity didn't exist anymore. Everyone had to get the vaccine regardless of whether they had natural immunity or not. Wait..... what? No one would ever suggest someone who had measles or polio should get vaccinated against those diseases. Why was natural immunity suddenly not talked about anymore? But if you knew where and how to look, it was talked about, and studied. The largest study was in Israel where the researchers concluded that natural immunity conveyed 27 times more protection than vaccination. Not double, not triple, 27 times! Fast Forward to recent times where an attorney in the US submitted a FOIA request, to the CDC, requesting records of any patient, who had a previous Covid infection, who was subsequently re-infected and then transmitted the Covid to another person. The CDC could not produce a single record of this ever happening. Yet for some bizarre reason, neither the government nor the media will ever talk about natural immunity and Covid together.

And now we are able to see much of the results of this mass vaccination campaign. And despite what you've been told, it's not good. Data from the UK is showing that vaccinated

adults under 60 are dying at twice the rate of the unvaccinated. American VAERS data shows these Covid "vaccines" have caused more deaths than all other vaccines combined in the last 30 years. In Europe, FIFA data has revealed a 500% increase in cardiac events and sudden deaths in soccer players. Very recently, the American Heart Association released a study which demonstrated that Mrna "vaccines" dramatically increase markers related to heart conditions. A recent German study showed that the higher a jurisdiction's vaccination rate, the higher it's mortality rate. On November 11th of this year, a Doctor Nagase came forward to report a record 13 still born births, in a 24 hour period, at BC Children's hospital. They average 1 per month. During a very recent Ontario provincial parliament debate, MP Rick Nicholls confronted the health minister about a sharp rise in still births from vaccinated pregnant women in Ontario. All he got for his efforts was deflection. Despite this new evidence beginning to come light, there has been absolute silence in the media. Instead, they now want to vaccinate our children. Children are at a near zero risk from Covid. Vaccinating children with these experimental drugs, with unknown long term side effects, which are starting to show increasing adverse effects, is absolutely criminal.

Since I refuse to go along with this coerced "vaccination" campaign, I am being forced onto Leave without pay. Despite the fact that approximately 70% of the Federal workforce gets testing as an option, for some inexplicable reason, the RCMP, the CBSA and Federal Corrections have a mandatory vaccination order. I refuse to go along with this. This is nonsensical, illegal and unethical. I will continue to refuse and I have obtained legal representation, along with hundreds of other federal employees. We will get our day in court and we will win. Some may ask where our union stands on the issue. The answer is they didn't. Our union leadership immediately bent the knee and offered no resistance whatsoever. Despite these setbacks, those who are fighting this know we have the truth on our side. The truth, at the moment, may be mere pebbles rolling down a slope. This will inevitably become an avalanche. So in reality, this isn't a goodbye email, it's a "see you in 2022" email.

Before I go, let me say this. Don't be afraid. The government, and their mouthpieces in the mainstream media, have promoted a nonstop campaign of fear for almost 2 years now. Turn off your television and radios. Do your own research and question everything. Knowledge begins with asking questions. With each new variant they will try and frighten you, despite the fact that never in the history of virology has a virus ever mutated to become more deadly. Selective pressures always favour a more contagious, but less deadly mutation. The new "scariant" is Omicron. They don't tell you that they skipped Mu and Xi in the Greek alphabet. Why? Because Mu or Xi just don't sound scary. When you hear some brain dead parrot repeat the talking point "trust the science," politely ask them to provide a definition of science. They never can because they don't know. What they are really saying, but are too stupid to realize,

is that they are saying "trust authority and don't ask questions." This, my friends, is the antithesis of science.

And get some sunshine. The latest German study, you know, actually science, showed an inverse relationship between vitamin d and Covid mortality rates. The study showed, given high enough vitamin d levels, a mortality rate of zero could be achieved. In addition, please don't let them inject this "vaccine" into your children. Why on earth would you allow an experimental drug to be injected into your children, from pharmaceutical companies that have a history of civil litigation settlements, where these same companies have blanket legal immunity from the vaccines they create, for a disease that your children are completely safe from? It's insanity. And the latest video where Trudeau explains he is excited to begin vaccinating children, looks completely psychotic and unhinged. Keep these lunatics away from your children. Your children are going to be just fine with their natural immunity.

.

I don't know how many people will get to read this. I suspect that once certain ranks are aware of this email it will be pulled from the server. That right there speaks volumes in itself. Silencing the last message of a 21 year veteran who was forced to leave simply because he didn't tell the government whether he had a drug in his body or not, doesn't portray a leadership of transparency or good faith. On the contrary, it demonstrates both cowardice and a complete betrayal of any professed principles. Before I go, if any of you believe in courage and freedom. You aren't alone. In fact, many members feel this way and they have created their own website: [mounties4freedom.com](http://mounties4freedom.com). Another concerned group of freedom loving Canadians has created [action4canada.com](http://action4canada.com). Check them out when you have time.

Anyways, I have taken up too much of your time as it is. Always laugh at those who would spread fear, and see you in 2022.

Corporal Richard Mehner, your "vaccine" free Minotaur

P.S. Chief Supt. De La Gogondiere,

I taped a copy of this letter on your office door, Martin Luther style. If you don't understand the historical reference I invite you to look it up.
