

SMART CITIES

Surveillance Monitoring Analysis Reporting Technology

20 MINUTE

10 MINUTE

5 MINUTE

1 MINUTE

Don't be fooled by the SMART / 15 minute / C40 city narrative, that is being touted as a way to save the planet and humanity whilst keeping you safe and providing the convenience of everything you need on your doorstep. Hand in hand with this is the implementation of Digital ID, CBDC (Central Bank Digital Currency) and Universal Basic Income (UBI), all to benefit **you**...right?!

The reality is drastically different:

- 24/7 surveillance through: the “internet of things” inside your home; 5G and LED streetlights with cameras and audio detection outside; to monitor/track/record everything.
- Implementation of exclusion zones and geofencing to restrict movement and travel.
- Ability to control behavior through military directed energy technologies.
- Property and car ownership outlawed - evictions from farms/ranches and rural areas in order to gather people into cities.
- Digital passport tied to social credit score which is determined by compliance to government directives - controls all access and all aspects of life.
- Digital currency implemented to end cash and monitor all spending. Digital currency turned off or on depending on compliance score.
- UBI - a State controlled allowance which forces compliance by restricting access to food, money, services, education, entertainment.
- All the above will enable “Climate” lockdowns to be implemented easily, arbitrarily and indefinitely.

The Real Agenda: To Monitor & Control EVERYONE & EVERYTHING!

Questions to ask your elected officials/representatives:
Can you explicitly guarantee that citizens will remain free to travel (as is their right under 56, 7 and 9 of the Charter of Rights and Freedoms) and that the city will not undertake any projects, pass any bylaws or install any equipment that has the

ability to:

- track and identify people or vehicles as they move through the town/city electronically control or physically restrict vehicles from residential areas or from travelling on existing roads
- fine vehicle owners or drivers for operating their vehicles in certain areas
- restrict access to essential services ie. medical care, bank accounts, pensions, government benefits, entertainment, sporting activities, travel, etc
- restrict access to utilities (ie natural gas, water, electricity, gasoline), municipal services (garbage disposal), public areas, housing, education, churches, groceries, wireless and telecommunications, employment, consumer activities
- impede citizens' ability to garden/farm (food security)
- collect personal data or distribute personal information publicly and/or violate protected privacy rights
- incentivise CBDc over the use of cash
- implement a social credit system
- enforce ESG (Environmental Social Governance) on businesses, employees and citizens.

If infrastructure is already in place serve them with the SMART City NOL and ask: who installed/authorized/funded the SMART City surveillance infrastructure? now that you have been made aware of this agenda that puts Canadians' safety and security at risk and infringes upon citizens' privacy and rights and freedoms, what will you do to reverse it?

Find out more and print off the SMART City and Mobility Rights NOLs here:
