

Canada: A Warning to the Nation

Tanya Gaw

Since the horrific attack that took place in Israel on October 7, 2023 **Action4Canada** has been focused on educating citizens about the bigger issue at play here, which is the rapidly growing threat of radical political Islam worldwide, and how the attack against Israel, and the importance of them winning this war, is significant to western civilization.

It is imperative that we side with Israel and acknowledge that Israel has a right to exist as a nation, a right to defend itself and that Hamas must be destroyed. The US is sending in the Navy and these military measures are necessary to allow Israel to fight without interference from other Islamic nations. Such as Iran who is funding and supporting Hamas and the attack against Israel because they hate the Jews and according to the teachings of Islam's sacred texts (the Qur'an, Hadith and the Sira) Islamists are instructed to annihilate the Jewish people as a race.

People need to understand that this war is not just about Hamas and the Palestinians but about who is behind them and what their goal is. Radical Islamists intend to destroy Israel and then, the West is next.

The Middle East was once 95% Christian and is now less than a 6% Christian population. Islam's goal is World Domination. The West has already been infiltrated and we must be able, and willing, to recognize our enemy and call them out for who they are.

Palestinian protests in Western nations are reported to be an arm of Hamas. They are flaunting their presence in Western nations worldwide and threatening and bullying anyone who opposes them. Thankfully, we are seeing some governments, such as in Germany, shutting them down and also reevaluating their allowable immigration numbers and policies.

We need to talk to our youth about what is going on, especially university students, because they are quick to jump onto a cause, even when it is founded on misinformation and they don't have a clue that they are aiding and abetting the enemy.

Jesus said in Matthew 12:25, *"Every kingdom divided against itself is brought to desolation, and every city or house divided against itself will not stand"*.

We cannot and must not blindly lock arms with our enemy, naively thinking we are supporting a good cause or that we will have a different result in Canada. Everyone has a responsibility to do their research and a quick look at Sweden, London and the UK gives a clear warning to the rest of us, of what is to come if we don't act.

In all of this we are not saying that Netanyahu is a Saint but there are two separate issues going on and we need to be able to differentiate between them. Many Israelis want him out of office but it would be the end of Israel if they were to go through that process right now. They must stay united and complete the task at hand and once Hamas is destroyed then they can take care of other business.

To put some of this in further perspective, I know that as a white, Christian woman I would be safe and welcome in Israel. However, I cannot say the same if I were to step outside of their borders. I believe I would not last two seconds in so-called Palestine. I would not be permitted to run for office in any of the 56 Islamic nations. There are 130 million Christians world-wide being persecuted and discriminated

against, the majority of whom are in the middle east. Another group that would not survive is homosexuals.

Another concerning fact is that Radical Islam instructs Muslims to lie if it assists them in subjugating and taking over a nation. Political Entryism is another means by which they are infiltrating Western nations and incrementally “taking over our miserable house from within” ... as the Muslim Brotherhood put it.

If this is of concern to you then you need to invest in the election process at all levels of government, either by running for office or supporting a candidate that fully embraces our foundation as a nation built on biblical Christian values.

In order for Canada to remain a beacon of hope for those who are fleeing death and persecution at the hands of radical Islam, we must be willing to not only face this clear and present danger but also expose it and eradicate it.

The matter of mass immigration and taking in refugees from violent third world nations, without properly vetting them, must become an election issue.

Contact your MP and demand the Canadian government put a moratorium on immigration...also sign Action4Canada's petition: <https://action4canada.com/moratorium-on-immigration/> Every time it is signed an email is sent to Trudeau and the Minister of Immigration.

Also, request that your MP immediately take steps to demand the government shut down the Palestinian marches in our streets as they are supporting terrorism and the massacre of innocent, unarmed, civilians, including children and infants.

God keep our land Glorious and Free and grant us great wisdom and favour in fighting this battle.
