**These events must be reported, investigated and corrected immediately**

Children have already been exposed to unprecedented amounts of fear, instability, shaming, psychological trauma, and segregation through the COVID-19 measures and are therefore even more susceptible to being influenced by those in authority than their developmental stage would usually entail. Schools include vaccine and COVID-19 “vaccine” curriculum, which is biased, prejudicial, and is a form of undue influence on any minor child. The curriculum excludes full disclosure of the growing risks (adverse reactions and death) of the experimental treatments, and the emerging evidence that the shots do not provide protection, as claimed. Informed consent with FULL disclosure is mandatory and yet, due to lack of research data, “full” disclosure cannot be provided.
