

Mask Notice of Liability:

Forced compulsion to wear face coverings, including but not restricted to masks in British Columbia

How to Serve the Notice of Liability

- Print two copies of the Notice of Liability.
- Fill in the name of the person being served in the space provided at the top of the first page - on both copies.
- Sign your name and fill in the date in the space provided on the last page - on both copies.
- Keep one copy of the Notice for your records.
- Give the second copy to the person being served. If they choose not to accept it, then leave it on the floor at their feet.
- If you are serving the Notice in person, be sure to video record yourself serving it (or audio record if video is not possible).
- **If sending by mail, you must use registered mail as that provides proof of delivery.**

Keep all information (e.g., Liability Notice copy, video, mailing proof etc.) in a safe place for future use.

NOTE: You do not need a lawyer to serve a Notice of Liability and you do not need consent, or the signature of the person you are serving it to.

Disclaimer: Action4Canada accepts no responsibility or liability for any harms or losses that occur as result of serving a notice of liability. If you do not agree to these terms, then please do not use this notice. We do not make any representations or warranties about the potential consequences of serving a Notice of Liability. This information is not intended as legal or health advice.

Notice of Liability: Forced compulsion to wear face coverings, including but not restricted to masks, in British Columbia

To: Anyone and everyone who is enforcing mask requirements in any private or public store, business, restaurant, school, hospital, seniors home, on any buses and transit, and in any indoor or outdoor public, private, or government facility or premises (establishment).

Attn: _____

Re: Forced wearing of face coverings/masks at your establishment, located at:

This is your first and only official Notice of Liability.

Forced orders to wear masks as a condition of entry to your establishment constitutes an illegal practice of health care, as defined in s. 1 (“health care”, “health care provider”) in the *Health Care (Consent) and Care Facility (Admission) Act* RSBC 1996 CHAPTER 181. Furthermore, you are not a legally qualified “health care provider” as defined in this Act, and therefore you are not authorized by law to issue such orders.

You are unlawfully practicing medicine by recommending, prescribing, requiring, incentivizing, mandating, or forcing me to wear a face covering or mask, especially under the punitive actions of denial of entry to your establishment.

As per s. 6 of the *Health Care (Consent) and Care Facility (Admission) Act*, it is my statutory and Constitutional right to have this choice, and I have not consented to this form of health care, and have refused to do so.

Recently, on _____, 202__, I attended your establishment. Because I was not wearing a face covering or mask prior to and as a condition upon entry, I was refused entry by you.

Compelling me to wear a mask as a condition of entry to your establishment, constitutes a violation of s. 8(1) of the *Human Rights Code* of British Columbia, on the basis of discrimination on the grounds of health, and/or religion.

This likely is further contrary to s. 346 (extortion) and s. 423 (intimidation) of the *Criminal Code* of Canada. This may be and likely is further contrary to s. 7 of the Charter of Rights and Freedoms if you are a government body, agent or delegate.

It has been medically documented and scientifically proven, supported by the laws of physics, that face masks cannot and do not prevent SARS-CoV-2 (COVID-19) viral transmission. Respiratory viruses are too small to be filtered by even the best masks available. Even the World Health Organization admits, “...there is only limited and inconsistent scientific evidence to support the effectiveness of masking of healthy people in the community to prevent infection with respiratory viruses, including SARS-CoV-2.”

Most retail boxes containing masks have a disclaimer directly on the box saying the masks do not stop viral transmission.

British Columbia’s Public Health Officer, Bonnie Henry, admitted under oath and penalty of perjury in Ontario¹, that masks do not prevent viral transmission and said, “...there’s very scant evidence about the value of masks in preventing the transmission of influenza” (COVID-19 and flu viruses are the same size).

Bonnie Henry has admitted on at least three Provincial newscast interviews, that masks do not stop viral transmission.

Canadian Denis Rancourt, former Professor of Physics at the University of Ottawa, went further: “There is no scientific basis for any benefit from mask wearing.”²

There are well over 65 scientific studies confirming masks do not stop the spread of viruses. (The World Health Organization has quoted no less than 10 scientific studies.) The B.C. Government has kept these studies secret.

In addition to the extensive science supporting the uselessness and futility of wearing masks in response to COVID-19 respiratory illness, there are documented dangers associated with wearing them.

Masks

- significantly increase carbon dioxide levels in the mask
- reduce oxygen levels by up to 15%³
- reduce concentrative abilities
- cause anxiety, stress, headaches as well as “*mask mouth*”
- prevent proper communication leading to anger confrontations
- are abusive on small children and youth
- are having a negative impact on our culture

In part due to the increased facial and mask touching, gaps and leakage, masks give a false sense of security. This can expose people to greater risk, and more so to the elderly during flu season. Masks further impede child development, as children need to see facial expressions to mature, both mentally and emotionally ⁴.

By forcing me to wear a mask to enter your establishment, you may and likely are violating s. 219(1) - criminal negligence - of the *Criminal Code*.

In addition to Constitutional, medical and religious reasons, to not be required to wear a face covering of any kind. Pursuant to the *Privacy Act* RSBC 1996 CHAPTER 373 I am not required to disclose any reasons for my decisions. Your establishment is not permitted to discriminate against me, nor do you have the legal power to compel me to wear a face covering against my free will.

There is no legislation that complies with our Constitution, and which complies with our common law, equity and contractual principles, that permits you or our governments to force me to wear a face covering or mask as a condition of entry into your establishment. Businesses are not private. When issued a business license, businesses are open to the public without discrimination. Forcing me to wear a face covering or mask violates the “*open doors*” principle applicable to all business relations.

Governments are constrained by our Constitution which further recognizes my right to life, liberty, and security of the person. Making face coverings mandatory is a violation of these rights.

Therefore, I hereby notify you that if you compel me to wear a face covering as a condition of entry into or onto your establishment, I will hold you personally liable for any financial and other damages, injury and/or loss, as well as any health repercussions, and any inability for me to provide food, shelter, and necessities for my family.
