Questions that Mike Beckwith sent to elected officials.

Watch Mike Beckwith's interview with Tanya Gaw on Sept. 13, 2023

You are encouraged to send the same questions to your elected officials.

1. How long have geo-engineering experiments and practices been on-going?
2. How does geo-engineering affect our climate?
3. How many patents are there that pertain to geo-engineering?
4. Is the science 'settled', or is the other opinion being suppressed?
5. Why are select data ranges used to predict future impacts?
6. Why do climate change gurus buy waterfront properties?
7. Why were there 400 private jets at the COP27 held in Egypt in November 2022?
8. Why was the earth warmer during the medieval times?
9. It is accepted science that the Great Lakes were formed by the expansion and contraction of glaciers. What caused these cooling/warming cycles?
10. What impact does the cycles of the sun have on earth's climate?
11. Why is a start-up company called 'Make Sunsets' (www.makesunsets.com) deploying sulphur compounds to the stratosphere to block out the sun's rays?
12. Is Canada a net emitter, or does all of the vegetation on our land end up being a net carbon sink?

Questions with Mike Beckwith's answers

1. How long have geo-engineering experiments and practices been on-going?

Since the late 1800's.

2. How does geo-engineering affect our climate?

In many ways, some of them even unimaginable. UN ENMOD "hurricanes, tidal waves or changes in climate".

1976 Convention on the Prohibition of Military or any Hostile Use of Environmental Modification Techniques

https://www.icrc.org/en/doc/assets/files/other/1976_enmod.pdf

3. How many patents are there that pertain to geo-engineering?

Haven't seen a definitive list, but would hazard to guess in the hundreds.

4. Is the science 'settled', or is the other opinion being suppressed?

It is being suppressed – there is lots of contradicting evidence that has not been allowed for scientific debate. True science is debatable...political science is not.

5. Why are select data ranges used to predict future impacts?

This is statistical manipulation. The hockey stick curves that are shown as predictions for the future are based on small sample size (1980's to early 2000's) where there was a short period of time when temperatures were rising. This small data set was then used to do regressional analysis (mathematical projection), which creates the hockey stick curve. If the full data set (going back to the 1950's) there would have been no climate hysteria.

New climate report paints harsh picture for future of Canada's coastlines

<https://www.theweathernetwork.com/en/news/climate/causes/new-climate-report-paints-harsh-picture-for-canada-coastlines>

6. Why do climate change gurus buy water front properties?

Because they know it is a lie. Also consider banks - If sea levels are supposed to rise as bad as the alarmist propose, why would banks still be open for business on 25, 30, 35 year mortgages??

7. Why were there 400 private jets at the COP27 held in Egypt in November 2022?

The rules are for the commoners (the serfs), not those in power. Two-tiered ruling system, which has been evident over the last 3 years. Canada Governor General travelled to a climate conference in Finland in February to deliver a speech on the dangers of carbon emissions. Her entourage of 15 people (4 days) produced 77 tons of CO2. The average mini-van (transport Canada) driven for a year produces about 3.5 ton CO2.

Governor General flies high on our dollars

<https://torontosun.com/opinion/columnists/gunter-governor-general-flies-high-on-our-dollars>

Michael Bloomberg has 6 planes, 3 helicopters, 11 houses and 42 cars – but thinks that you should take public transport to save the environment.

<https://ifunny.co/picture/michael-bloomberg-has-6-planes-3-helicopters-i-use-public-0iHyvDmL7>

Flight records show Michael Bloomberg's private jets took more than 1,700 trips and emitted at least 10,000 metric tons of CO2 in the past four years

<https://www.businessinsider.com/michael-bloomberg-private-jets-data-2020-8>

8. Why was the earth warmer during the medieval times?

Articles say that it was likely due to the El-Nino / La-Nina phenomenon, increased solar radiation, fewer volcanic eruptions, etc. Regardless of that, we need to ask ourselves – how / why was the earth warmer during that period when there weren't 8 billion people burning hydrocarbons?

World was much warmer in Roman and Medieval times than it is now

<https://news.yahoo.com/news/world-much-warmer-roman-medieval-times-now-104205882.html>

9. It is accepted science that the Great Lakes were formed by the expansion and contraction of glaciers. What caused these cooling/warming cycles?

Science has generally accepted that the earth has been subjected to go into and come out of ice-ages. What caused those changes? Was there 8 billion people burning hydrocarbons?

10. What impact does the cycles of the sun have on earth's climate?

This has not been studied as much as people may think. There is still a lot of unknowns with the cycles of the sun. However, it is accepted science that the sun goes through 11 year cycles of solar minimum and solar maximum.

Understanding the solar cycle and its impact on our climate and climate change

<https://www.cbc.ca/news/canada/edmonton/solar-cycle-climate-change-project-1.6631988>

NASA argues that these cycles are not enough to impact the earth's climate. Does that make sense? The cycles of the very ball of fire that gives energy don't impact our climate??? Then why are they trying to block the sun's rays to combat climate change? NASA knowing about earth wobble relative to the sun. – Milankovitch Cycles

Milankovitch (Orbital) Cycles and Their Role in Earth's Climate

<https://climate.nasa.gov/news/2948/milankovitch-orbital-cycles-and-their-role-in-earths-climate>

11. Why is a start-up company called ‘Make Sunsets’ (www.makesunsets.com) deploying sulphur compounds to the stratosphere to block out the sun’s rays?

Make Sunsets (<https://makesunsets.com>) – This is a group that is wanting to (and likely already has been) put reflective particles into the upper atmosphere to reflect sunlight/energy back out, away from the earth surface. They argue that this is mimicking the effects of a volcanic eruption. On the surface it does not look like it is large scale, but that information may be hidden at this time.

12. Is Canada a net emitter, or does all of the vegetation on our land end up being a net carbon sink?

In the spring of 2016, the Financial Post put out an article entitled: “Canada may already be carbon neutral, so why are we keeping it a secret?”

Canada may already be carbon neutral, so why are we keeping it a secret?

<https://financialpost.com/opinion/canada-may-already-be-carbon-neutral-so-why-are-we-keeping-it-a-secret>

This article states: “A conservative estimate of Canada’s existing carbon-absorption capacity, based on land area and the global carbon-absorption average, indicates that Canada could already be absorbing 20 to 30 per cent more CO₂ than we emit. Using the same calculation, the “Big Four” polluters of China, the U.S., the European Union, and India, which together are responsible for a whopping 60 per cent of global CO₂ emissions, release 10 times more CO₂ than their combined land area absorbs. Canada doesn’t seem very dirty now, do we?”

This is the end of the questions that Mike sent to elected officials. He has provided more questions and information below:

13. What is the target level of CO₂ in the atmosphere?

Currently it is about 420 ppm (0.042%), but dropping it below 200 ppm will severely affect plant life. We were taught about the water cycle, but we don’t seem to want to discuss the carbon cycle – CO₂ to atmosphere – plant growth through photo synthesis

– mammals consume plant matter

– plants convert CO₂ to oxygen.

Oxygen is pretty important! Humans are carbon-based beings.

14. Scientist finds that carbon dioxide concentrations in the atmosphere go up, AFTER the temperature rises. Real science states that the effect cannot become before the cause.

Net zero shock: Carbon dioxide rises AFTER temperature increases, scientists find <https://www.sott.net/article/468726-Net-zero-shock-Carbon-dioxide-rises-AFTER-temperature-increases-scientists-find>

15. 500 scientists have stated that there is no climate emergency

There Is No Climate Emergency, Say 500 Experts in Letter to the United Nations
<https://www.aei.org/carpe-diem/there-is-no-climate-emergency-say-500-experts-in-letter-to-the-united-nations>

16. More than 1600 scientists state that there is no climate emergency.

Global Climate Intelligence Group: World Climate Declaration
<https://clintel.org/wp-content/uploads/2023/08/WCD-version-081423.pdf>

17. Changes in Antarctic Ice Shelf: article states that ice area has grown by 5305 km² since 2009, with 18 shelves retracting and 16 growing

Change in Antarctic ice shelf area from 2009 to 2019
<https://tc.copernicus.org/articles/17/2059/2023/tc-17-2059-2023.pdf>

18. A July 2023 article claims that scientists were ordered to cover up the truth about the global warming narrative. A study initiated by the **Intergovernmental Panel on Climate Change (IPCC)**, an intergovernmental body of the **United Nations**, was to gather evidence of man-made global warming. A leak has stated that hundreds of the scientists involved with the study are stating that the global temperature has not increased over the last 15 years and the true report confirmed that 1998 was the warmest year on record.

Top Climate Scientists Blow Whistle, Expose ‘Cover-Up’
<https://newsaddicts.com/top-climate-scientists-blow-whistle-expose-cover-up>

19. Why is the CPP investment board investing money into Chinese coal projects when the Canadian provincial and federal governments are destroying that industry here?

Canadian Pension Board Invests \$141M in Chinese Coal Projects, Undercutting Federal Phaseout Policy
<https://www.theenergymix.com/2020/08/24/canadian-pension-board-invests-141m-in-chinese-coal-projects-undercutting-federal-phaseout-policy-2/>

20. Dr. John F. Clauser – the recipient of the 2022 Nobel Prize in Physics is calling the climate emergency narrative “a dangerous corruption of science that threatens the world’s economy and the well-being of billions of people”

Nobel Laureate: Climate Science Has Metastasized Into Massive Shock-Journalistic Pseudoscience
<https://gript.ie/nobel-laureate-climate-science-has-metastasized-into-massive-shock-journalistic-pseudoscience/>

21. Directed Energy Weapons: This document gives an overview of directed energy weapons and their capabilities. Notice the “Active Denial System” function for crowd control. “DEWs can deny entrance to an area or prevent enemy forces or assets from functioning within an area.” The device microwaves the water molecules within the human body. This document also states that the power and frequency can be tailored to ensure destruction of the target.
