

Did you know?

SERC's (Sexuality Education Resource Centre MB) learning resources are Trojan horses, brought into schools under the guise of sexual health education, but are really intended to sexualize, indoctrinate and groom children at the earliest age possible. Visit: SERRC.mb.ca

Examples of explicit books available to grades K-12 in our schools and public libraries.

The Canadian government, as well as the education system, has been infiltrated by radical LGBTQ activists who are using the SERC/SOGI 123 learning resources **to promote homosexuality and transgender ideology, and normalize sexual deviancy.**

The SERC learning resources promote and endorse **vile sexually explicit and pornographic books** which are available to children and youth through the schools, as well as in public libraries and online. This is resulting in many young people being exposed to pornographic materials and websites, being encouraged to masturbate, and experiment sexually with the same sex.

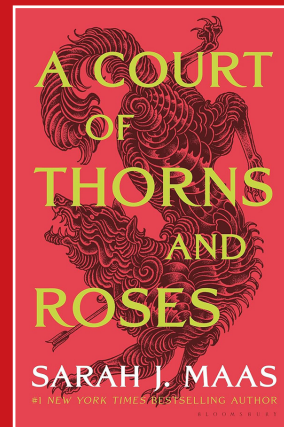

Children and youth are also being indoctrinated into believing their gender is fluid and non-binary. As a consequence, a growing number of young people are **tragically experiencing rapid onset gender dysphoria** and the only treatments offered are puberty blockers and/or surgeries that permanently mutilate their bodies and sterilize them.

The LGBTQ/Trans activists are manipulating society to accept their agenda by victimizing trans people and saying that kids who struggle with gender identity are at a heightened risk of suicide and, therefore, we need to support them in order to help them feel accepted. The reality is that **there is a 20% increase in suicide for those who transition** and transgender regret is exploding as individuals realize they were deceived into following this path.

The number of students who struggled with transgenderism, prior to the use of the SOGI 123/SEIRC resources, was zero. This is an adult sexual proclivity, not a child's. SOGI 123/SEIRC has created a social contagion. There is an **over 451.5%** increase in girls who now say they identify as a boy. This number is from 2018 and has since significantly increased as a direct result of the SOGI learning resource.

"Some educationalists have previously warned that the promotion of transgender issues in schools has sown confusion in children's minds and that encouraging children to question gender has become an industry," the Telegraph reported.

On Jan 7, 2022, Bill C-4 came into effect, making it a criminal offence if you do not support a child's gender dysphoria. **In other words, you (the parent), could be criminally charged and go to jail for advising your daughter not to have her breasts removed.** In April 2021, a father in BC was sent to jail for 6 months for opposing his 14-year-old daughter's gender transition.

What you can do:

• Serve Action4Canada's Notice of Liability (action4canada.com/notice-of-liability-remove-explicit-books-and-radical-lgbtq-learning-resource) to School Board Trustees, Principals, Educators, Librarians, Ministers of Education etc and demand they completely remove the SERC/SOGI 123 learning resources, the sexually explicit and pornographic books, and prohibit drag queens from having any access to children.

• Homeschool your child/children (action4canada.com/homeschooling-revolution) Are you aware that you can teach your child more in two hours than they will learn in a five hour school day and the best part is, they will not be at risk of indoctrination? **Action4Canada** is an organization dedicated to protecting our children, families, businesses, churches and citizens from the pressures of government, health administrators and schools. We need Canadians from across the country to step up and lead in their own communities, cities and provinces.
