

# USE CASH NOT CREDIT

# SUPPORT BUSINESSES **NOT** BANKS

Using cash helps businesses avoid transaction fees and government overreach, as well as supporting your local economy and community and helps you by keeping your location and purchases private.

## KEEP cash alive to avoid CBDC!

### WHAT IS CBDC?

Central Bank Digital Currency is programmed to the individual, which means the bank/government will have the ability to totally control *your* access to *your* money. It will:

- **Limit** where, when and what you spend your money on.
- Increases risk of identity theft and online hacking.
- Monitor and record **every transaction** you make.
- Automatically **take fines, taxes and charges** from your account.
- Give your money **an expiry date**, making saving impossible.
- Link your wallet to a **carbon allowance** and **social credit score**.
- Freeze your account so you are **unable to buy anything**.
- **What happens when the power goes out?** Cash will always work.

Help keep the cash infrastructure in place to negate CBDC
